

Citizen Science Adventure: Dubai Hills Park

Using **Seek by iNaturalist**

Location: Dubai Hills Park

Mission: Discover and document as many different living things as you can!

How It Works

1. Open the [Seek by iNaturalist](#) app.
2. Walk around the park and scan plants, animals, and insects.
3. Try to identify each species using the app.
4. Record your discoveries below.
5. Earn badges and become biodiversity experts!

Your Challenge

Try to find **at least one** of each category:

- Tree
- Flower
- Grass or small plant
- Insect
- Bird
- Mammal (pet or wild)
- Spider or other creepy crawler
- Something slow-moving
- Something tall
- Something tiny

Bonus: Find something you've NEVER seen before!

Think Like a Scientist

Answer these after your exploration:

1. Which species did you see the most?
2. Which was the hardest to find?
3. What surprised you the most?
4. Why do you think Dubai Hills Park has so many (or few) species?

Why This Matters

Every observation helps scientists understand nature better. You are contributing to real science just by exploring! Have fun, stay curious, and keep discovering! ✨
